Vadodara , Gujarat , India

ABOUT ME

"I am a Full-Stack Software Engineer and National Hackathon Finalist specializing in building robust, scalable web architectures and mobile applications. With hands-on experience spanning professional internships and client-facing freelance engineering, I focus on delivering clean, optimized, production-grade code.

Technical Expertise:

- Full-Stack Web: MERN Stack (MongoDB, Express.js, React, Node.js) | Python (Django)
- Mobile Development: Native Android (Java)
- Core Fundamentals: Data Structures & Algorithms (DSA), OOPS .

EDUCATION

B.TECH (CSE)

AUG 2023 - Oct 2027

PARUL UNIVERSITY

- current CGPA 7.8 .

HSC (PCM)

MAY 2021 - FEB 2023

MAKTABAH JAFARIYAH

- CGPA 60% .

PROFESSIONAL EXPERIENCE

Freelancer

Feb 2026 - April 2026

- B2B E-Commerce Platform (Django):** Architected a scalable B2B wholesale platform with Django and PostgreSQL, implementing RBAC and optimized query filtering to slash catalog load times by 40%.
- Raahbar E-Commerce (MERN):** Developed an end-to-end marketplace featuring secure payment webhooks, JWT-driven authentication middleware, and Redis/cookie-based session management for persistent user carts.
- YDRC Social Platform (MERN):** Built a full-stack social network using custom Express middleware, secure session handling, and MongoDB aggregation pipelines to stream high-performance, real-time activity feeds.

Unessa Foundation

Dec 2025 - Feb 2026

- Engineered backend architectures using MERN and Django, implementing custom Express middleware and strict CORS policies to secure cross-origin API communication.
- Automated live deployments to Render via GitHub version control, managing environment variables and build pipelines for zero-downtime, production-ready applications

WELLBINIX.LTD

May 2025 - June 2025

- Architected backend services using Django and SQLite, building custom middleware and robust CORS configurations to ensure secure, cross-origin API routing.
- Optimized database performance by engineering efficient SQLite .

TECHNICAL SKILLS

- Languages :** Python, Java, C, XML, SQL
- Frameworks & Runtimes :** Django, Node.js, Express.js, MERN Stack
- Databases & Cloud :** MongoDB, SQLite, Firebase (Firestore & Authentication)
- Developer Tools & Version Control :** Git, GitHub, VS Code, Android Studio
- Core Engineering & Integration :** RESTful API Design (Creation & Consumption), ML model Integration (Predictive Analytics), Custom Middleware, CORS Configuration, Native Android Development

PERSONAL PROJECT'S

ADMINA (HRMS)

DJANGO FULL STACK

- Solo-built an automated HRMS featuring role-based admin workflows for task assignment, dynamic leave approvals, and real-time employee check-in/out logging.
- Integrated a GitHub-linked reporting system that synchronizes developer commit history directly into task logs to automate verifiable employee productivity metrics.

EMPLOYEE ATTRITION SYSTEM

DJANGO FULL STACK

- Engineered an predictive attrition dashboard allowing admins to upload CSV datasets and dynamically identify high-risk employees likely to leave in advance.
- Integrated machine learning pipelines with full-stack analytics interfaces to visualize future turnover trends and deliver proactive retention insights to management.

STAYFORWARD

MERN FULL STACK

- Architected an Airbnb-style platform utilizing Express, EJS, and MongoDB, implementing custom authentication middleware and robust session management to secure dynamic rental listings.
- to handle dynamic rental listings, user authentication sessions, we use MongoDB for persistent data handling

AGRO ECOMMERCE

DJANGO FULL STACK

- Architected a full-stack web application featuring secure user authentication, product search engines, and an intuitive administrative portal for seamless product catalog management.
- Engineered an end-to-end transactional workflow allowing users to execute secure orders, generate automated billing invoices, and monitor real-time purchase tracking.
- Implemented optimized database relations to synchronize admin inventory changes, user checkout pipelines, and historical order logging with low latency.

Chat'sUp Application

APP FULL STACK (JAVA)

- This is a messaging app, which shows message on send and receiver side on real-time
- uses firebase for real time data

Nauha app + Express , Node API

APP FULL STACK (JAVA)

- Developed a high-performance content delivery application powered by a Node.js and Express RESTful API backend to serve readable text and poetry assets efficiently.
- Integrated a cloud database system to securely manage user profiles, dynamic text bookmarking states, and high-concurrency content metadata with minimal latency.
- Engineered optimized API endpoints for seamless text retrieval, featuring real-time search filtering and structured database querying for text resources.

ACHIEVEMENTS AND CERTIFICATES

- **AWS Certified Cloud Practitioner** : Validates foundational cloud knowledge and the ability to articulate the AWS Cloud value proposition.
- **Smart India Hackathon** : Proud member of the team that was shortlisted in the top 45, showcasing strong problem-solving and teamwork skills.
- **AI/ML Hackathon 2.0** : Shortlisted in the top 128 out of 1800 teams, demonstrating expertise as a Django developer in a high-pressure, competitive environment.
- **NPTEL Certificate** : Earned an Elite certification in 'Computer Networks And Internet Protocol', validating a strong understanding of network fundamentals.
